

Nurse AI OS Founding Year Guide

Directive v1.1 public offer boundary

Current operator: Robert Domondon, acting as the individual founder and steward of the Nurse AI OS project. NAIO and NIN are project initiatives, not separate contracting, assurance, or certification entities for these offers.

What is free

The browser-first Community core and self-customization path are **\$0 forever**. The free core includes the SOUL Quiz, Starter Kit, core prompts, templates, public safety guidance, and self-directed customization.

No card is required for the free core. There is no automatic upgrade, automatic enrollment, or automatic future bill.

Optional bounded offers

Availability must be confirmed before payment.

- **Tailor-fit setup:** \$10 one time for one no-PHI, human-prepared personal customization. It includes one correction round for agreed deliverables within seven days and no automatic renewal.
- **Developed-resource library:** \$29.90 per year for access to the resources actually listed and released for that library during the paid term. Renewal terms must be shown before checkout; there is no automatic enrollment.

These optional offers do not include clinical configuration, PHI processing, credential verification, continuing-education credit, institutional approval, guaranteed outcomes, or independent NAIO assurance.

The detailed, controlling descriptions are published at nurse-ai-os.org/offers.html.

Founding-year recognition

Founding-year recognition is a project acknowledgment available through **December 31, 2026** under the terms stated when it is offered. It is not a subscription, credential, license, professional designation, or promise of future benefits. It creates no automatic billing after that date.

Data and action boundary

- Community use is D0/D1 only; never enter PHI, patient data, employer-confidential data, credentials, passwords, or secrets.
- Green supports Observe or Draft only. Any ranking or proposed course of action is Yellow Recommend and requires evidence and human review.
- No external action, clinical decision support, EHR connection, employer authorization, or institutional authority is included.
- EDENA is governance guidance here, not proof of mechanical enforcement by a browser AI or optional host.

Your responsibilities

Inspect every output, understand the privacy settings of the AI service you choose, protect local files, follow employer and professional rules, and stop when scope is uncertain.

Exit boundary

You may stop using the free materials and delete local files at any time. Ending an optional paid term does not remove the permanent free core. Public materials may evolve under their applicable licenses and version history.
